DETAILED ACTION

Response to Arguments

1. Applicant's arguments, filed October 30, 2003, with respect to claims 1-32 have been fully considered and are persuasive. The rejection of claims 1-7, 9, 10, 12-21, 23-26, 29, 30, and 32 has been withdrawn.
2. The examiner concurs with the applicant's arguments regarding the combination of the Kizuki, Bestwick, Chapple-Sokol, and Doyle references.

Allowable Subject Matter

3. Claims 1-32 are allowed.
4. The following is an examiner's statement of reasons for allowance: the examiner is unaware of any single electron transistor which uses a wire structure formed in a trench between the source and the drain such that the wire is preferentially grown on a specific crystal plane (the bottom of the trench or (100) plane) relative to the sidewalls of the trench.
5. Park et al. (USPN 5,942,790) discloses a device which can act as a single electron transistor. However there is no disclosure of a wiring structure formed in a trench. Thus the Park device does not teach the applicant's invention.
6. Fukuda (USPN 5,945,686) discloses a single electron transistor. Such as the Park device discussed above, there is no disclosure of a wiring structure formed in a trench. Thus the Fukuda device does not teach the applicant's device.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
